EDUCATION

BRAC University

Bachelor of Science in Computer Science

2022-2025

CGPA: 3.23/4.00

EXPERIENCE

Jr. Software Engineer

CPS Academy

Nov 2025 – Mar 2026

Remote

- Developed course management and student enrollment features for programming courses
- Collaborated with team using Scrum methodology for agile development and sprint planning

Part-time Developer

BRAC Business School

Aug 2025 – Mar 2026

BRAC University

- Built, maintained and hosted International Conference websites (e.g., [ICCBM 2025](#))
- Deployed and managed internal portal, integrating custom domain to streamline faculty collaboration.

Independent Full-Stack Developer

Fiverr

Aug 2025 – Present

Freelance

- Delivered 10+ full-stack projects consistently achieving 5-star ratings and securing repeat orders.
- Successfully completed complex milestones earning \$250.00+

PROJECTS (DJANGO)

Pulse Campus | *Django, Celery, Unit Tests, PostgreSQL*

[Live](#) | [GitHub](#)

- Built a comprehensive college management system using Django, hosted via Nginx on VM.
- Designed RBAC to manage departments, classes, clubs, noticeboards and forum posts with comments.
- Used PostgreSQL with Django ORM for reliable database management and optimized query performance.
- Images and files for forum posts and notices are stored and served via Amazon S3.
- Integrated Celery with Redis to handle asynchronous email notifications as background jobs.
- Set up CI/CD pipelines using GitHub Actions to automate testing and deployments.
- Achieved 98% code coverage by writing comprehensive tests targeting models, views, and asynchronous tasks.

Chotto URL | *React, Django REST Framework, Docker, Cloud Run*

[Live](#) | [GitHub](#)

- Developed a full-stack URL shortener using React and Django REST Framework.
- Engineered a responsive user interface and secure API integration for fast, reliable URL redirection.
- Containerized and deployed the application using Docker on Google Cloud Run.

SendWish | *Django, Docker, HTML, CSS*

[Live](#) | [GitHub](#)

- Built a responsive web application utilizing HTML, CSS, and Django to facilitate anonymous email sending.
- Configured form handling and email sending capabilities to support custom subject, body and file attachments.
- Integrated user feedback mechanisms to display success and error notifications following each send attempt.
- Containerized and deployed the application using Docker on Google Cloud Run.

Copy Pasta | *Django, Docker, Cloud Run, Amazon S3*

[Live](#) | [GitHub](#)

- Built a Django application for seamless, unauthenticated text and file transfers across devices.
- Implemented a custom key system for secure uploading, retrieving, and editing of shared files.
- Deployed via Docker on Cloud Run, utilizing Amazon S3 and CloudFront for content delivery.
- Achieved 95% code coverage by writing comprehensive unit tests for core application logic.

QR Code Generator | *Django, Docker, HTML, CSS*

[Live](#) | [GitHub](#)

- Developed a server-side rendered full-stack web application using Django for instant QR code generation.
- Implemented customization features allowing users to define specific foreground and background colors.
- Engineered functionality to generate and download high-resolution PNG images suitable for large-format printing.
- Containerized and deployed the application using Docker on Google Cloud Run.

PROJECTS (FRONTEND)

Personal Portfolio | *Next.js 15, Tailwind CSS, Framer Motion* [Live](#) | [GitHub](#)

- Built a responsive portfolio using Next.js 15, featuring Framer Motion animations and persistent themes.
- Developed an interactive project showcase with skill-based filtering, detailed modals, and achievement tracking.
- Optimized SEO with Open Graph and integrated Microsoft Clarity analytics to monitor user engagement.

Chotto URL (Frontend) | *React, Tailwind CSS* [Live](#) | [GitHub](#)

- Built the frontend interface for a URL shortening service utilizing React and Tailwind CSS.
- Engineered real-time tracking to display live statistics for active links, total links created, and total clicks.
- Implemented client-side input validation for URL formats and a one-click clipboard copy feature to enhance user experience.

Quiz App | *HTML, CSS, JavaScript, API* [Live](#) | [GitHub](#)

- Built an interactive trivia web application utilizing HTML, CSS, and JavaScript with asynchronous API integration.
- Integrated the Open Trivia Database API using fetch and async/await to serve real-time questions dynamically.
- Implemented customizable game settings, including difficulty filters and question counts, alongside real-time score and timer tracking.

Tic-Tac-Toe | *HTML, CSS, JavaScript* [Live](#) | [GitHub](#)

- Developed a responsive Tic-Tac-Toe web game featuring both local two-player and automated computer opponent modes.
- Engineered robust game logic for automatic win and draw detection, alongside fair play rotation to alternate starting players.
- Implemented interactive features including persistent score tracking, move undo functionality, and custom player name prompts.

Calculator | *HTML, CSS, JavaScript* [Live](#) | [GitHub](#)

- Developed a responsive web-based calculator application using HTML, CSS, and JavaScript.
- Implemented core arithmetic operations including addition, subtraction, multiplication, and division.
- Engineered advanced features for percentage calculations and remainder evaluation to enhance utility.

PROJECTS (ANDROID)

Periodic Table | *Kotlin, Jetpack Compose* [Play Store](#) | [GitHub](#)

- Built an interactive Android application using Kotlin and Jetpack Compose to visualize the periodic table.
- Implemented search functionality and detailed chemical data views, supporting both English and Bangla.
- Deployed to the Google Play Store, featuring dynamic light and dark themes for an enhanced user experience.

Tasbih Counter | *Kotlin, Jetpack Compose* [GitHub](#)

- Developed a digital prayer counter application utilizing Kotlin and Jetpack Compose.
- Engineered a completely offline architecture requiring zero device permissions to ensure complete data security.
- Designed an intuitive, one-tap interface featuring instant reset functionality and a custom Islamic-inspired UI.

TECHNICAL SKILLS

Languages: Python, JavaScript, Kotlin, SQL

Backend: Django, Django Rest Framework, Celery, Redis

Frontend: React, HTML, CSS

Database: PostgreSQL, SQLite, Django ORM

Tools and Platforms: Linux, Git, Docker, Google Cloud, AWS

ACHIEVEMENTS & CERTIFICATIONS

- Represented BRAC University at ACM ICPC Asia Dhaka Regional 2023 (Top 110) and NCPC 2023 (Top 100).
- Achieved Pupil (1321) on Codeforces, 3-Star (1602) on CodeChef and solved 2,100+ problems across many platforms.
- Achieved Web Development Fundamentals certification by IBM and Python Essentials 1 certification by Cisco.
- Earned HackerRank Intermediate certifications (REST API, SQL, Problem Solving).
